Assignment 5C – Sprint 2
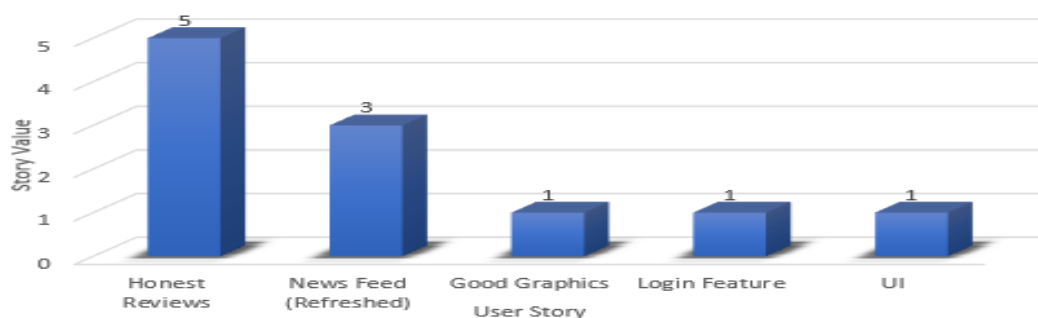

Contents

Pre-requisites from Assignment 5-A, 5-B

Assignment 5A

The graph below, made by our PO shows the user story values for our user stories.

| user story	story value			
Honest Reviews	5			
News Feed (Refreshed	3			
Good Graphics	1			
Login Feature	1			
UI	1			

story value

Thankfully we have finished all of them over our sprints. During our first sprint we were unable to finish all our planned stories therefore we moved it to sprint two. Our sprint velocity in the first sprint was four while sprint two was seven.

Assignment 5B

Below are our planned user stories for sprint two.
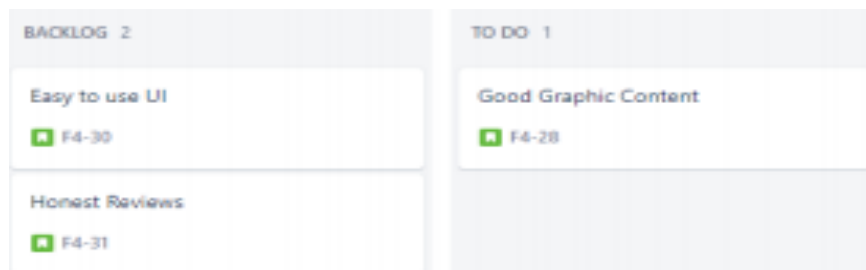

This week our Software Developer prioritized our user stories based on the most important things.

The rest of the team was happy that we finally got the project finished.

Sprint 2 Progress/End of Sprint 2 Demo/Review and Retrospective
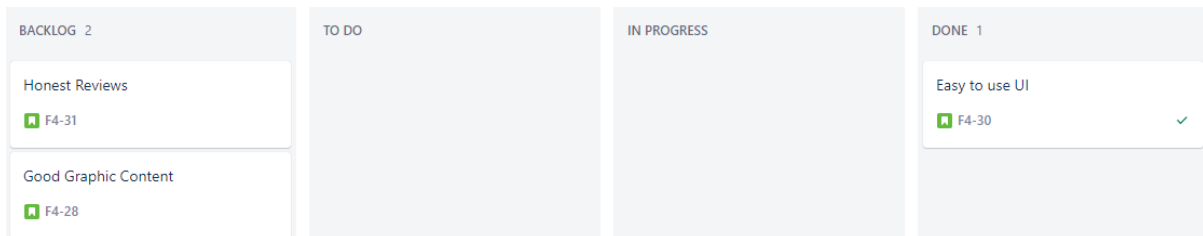

During Sprint 2

In the beginning of Sprint Two. Our Software Engineer Oskar moved "Easy to use UI" user story to "To Do" table. During one of our labs himself and the team PO Connor decided what to change on the navbar.

| BACKLOG 2	TO DO 1	IN PROGRESS	DONE
Honest Reviews F4-31	Easy to use UI F4-30		
Good Graphic Content F4-28			

Afterwards he moved it to "In Progress" and started working on the changes. He spread out the contents on the navbar to each side and centre of the navbar.
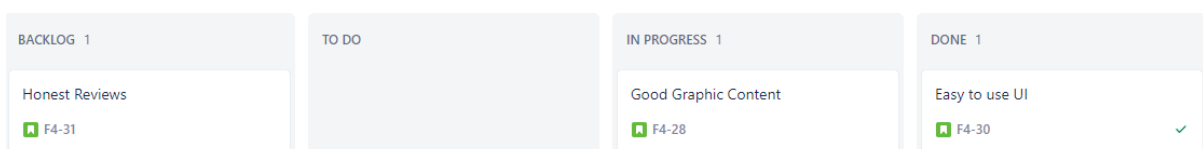

BACKLOG 2	TO DO	IN PROGRESS 1	DONE
Honest Reviews F4-31		Easy to use UI F4-30	
Good Graphic Content F4-28			

When he was done, he moved the story to "Done".

BACKLOG 2	TO DO	IN PROGRESS	DONE 1
Honest Reviews F4-31			Easy to use UI F4-30 ✓
Good Graphic Content F4-28			

He made a few changes as he was working on the project. He then moved "Good Graphic Content" to "To Do".

BACKLOG 1	TO DO 1	IN PROGRESS	DONE 1
Honest Reviews F4-31	Good Graphic Content F4-28		Easy to use UI F4-30 ✓
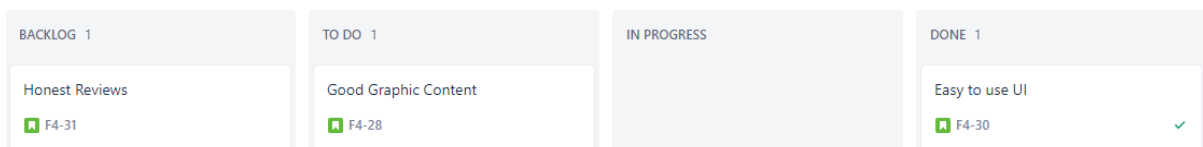

Oskar added About Page to the code and started planning out the layout of the page. He added the team photo and other valuable information about the team. After that he moved "Good Graphic Content" to "In Progress" but didn't yet start working on it because he had a few fixes to make and add small bits to the page that were also as important. Afterwards he changed images on the home/index page.

BACKLOG 1	TO DO	IN PROGRESS 1	DONE 1
Honest Reviews F4-31		Good Graphic Content F4-28	Easy to use UI F4-30 ✓

Then he moved "Game Reviews" user story to "To Do" and asked his team to write up their reviews.

BACKLOG	TO DO 1	IN PROGRESS 1	DONE 1
	Honest Reviews	Good Graphic Content	Easy to use UI
	F4-31	F4-28	F4-30 ✓
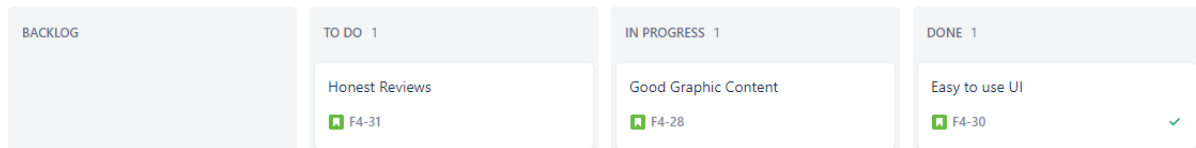

While they were doing that, he started designing the page. Oskar then moved "Game Reviews" to "In Progress" and started implementing the reviews he got from the rest of the team onto the website.

BACKLOG	TO DO	IN PROGRESS 2	DONE 1
		Good Graphic Content	Easy to use UI
		F4-28	F4-30 ✓
		Honest Reviews	
		F4-31	
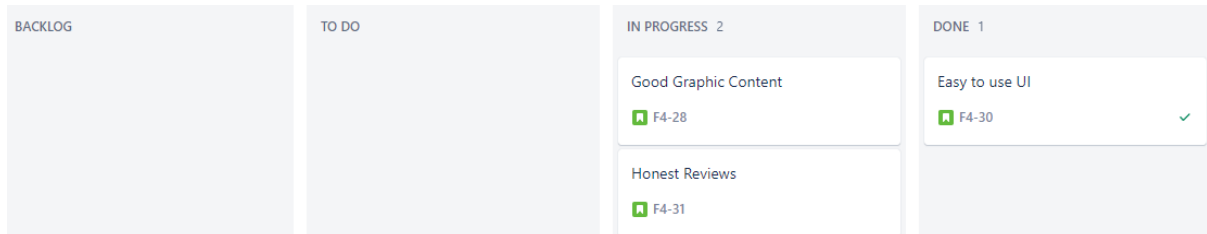

The team also gave good images to their reviews which made the review more appealing visually. He moved both stories from "In Progress" to "Done".

On the last day of sprint 2. Fri 13th March

On the last day of this Sprint, we uploaded the project to GitHub.

Out PO has accepted the project as it was and was happy that the team has worked on it well.

A day after the sprint due date Oskar found some errors in text. He fixed the errors and uploaded the final version of the project to GitHub.
